DETAILED ACTION

Specification

The newly submitted title is accepted by the examiner.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Prior art fails to disclose a magnetic motor having a plurality of rotor magnets positioned along a rotor and attached to a main shaft, in combination with a plurality of drive magnets positioned along a drive magnet hub that is located generally inside the rotor. In which the drive magnet hub is laterally moveable into and out of the inside of the rotor for varying the distance between the rotor magnets and the drive magnets to increase and decrease the magnetic drive force applied to the rotor magnets by the drive magnets in order to control torque and speed of the shaft in combination with a timing assembly for receiving power and generating power pulses selectively supplied to each rotor magnet.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
